SUMMARY

BCA student and aspiring Web Developer. Currently expanding expertise in HTML, CSS, JavaScript and React, focused on building clean, responsive, and accessible user interfaces. I enjoy turning wireframes into functional apps, solving UX and performance problems, and collaborating across teams. Adaptable, quick to learn, and eager to apply problem-solving and teamwork skills to real-world projects while continuously building my portfolio.

TECHNICAL SKILLS

HTML, CSS JavaScript	React Python	Figma UI/ UX	Responsive Design Wireframing	Teamwork Adaptability
-------------------------	-----------------	-----------------	----------------------------------	--------------------------

ONGOING PROJECTS

- Cancer Awareness & Hospital Support Web Page**
- Built a responsive, multi-section webpage with interactive cards, location-based hospital listings, patient stories carousel, and a responsive layout.
